WORK EXPERIENCE

The Next Something

Founding Engineer

Sep 2026 - Present

Script Ventures

Junior Software Engineer

Feb 2026 - Sep 2026

- Contributed across a production healthcare payments platform: Angular web apps, NativeScript mobile, .NET APIs, SQL Server and Azure services.
- Worked on authentication, payments, REST/OpenAPI contracts, EF Core data access and background jobs; supported Azure DevOps pipelines, Docker publishing and AKS deployments.

Independent Contracting

Software Engineer

Dec 2025 - Mar 2026

- Designed, built and maintained full-stack client applications serving hundreds of active users across Australia's eastern states.
- Owned requirements, implementation, deployment and support, working directly with clients to deliver updates.

Lightbulb Skills

Software Engineer - Fullstack and Infrastructure

Oct 2024 - Dec 2025

- Built and maintained a production CRM with Next.js, React and PostgreSQL, owning schema design, UI development and iterative feature delivery.

EDUCATION

Curtin University

Bachelor of Computing, Computer Science

Feb 2026 - Oct 2028 (expected)

- Results: Unix and C 97; Fundamentals of Programming 95; Programming Design and Implementation 94; Data Structures and Algorithms 93.
- Letter of Commendation; transferred from Mechatronic Engineering and Computer Science (2025).

PROJECTS

Tactify (AI accessibility platform)

- Built at Perth Hackerhouse: converts visual learning materials into tactile-ready SVG graphics and guided audio narration for blind and low-vision users.
- Implemented a Next.js/React interface, Go backend, protobuf APIs and Gemini, ImageMagick, vtracer and text-to-speech pipeline.

Still (Rust developer tooling)

- Built a Rust project environment manager with typed configuration, lockfiles and CLI/TUI frontends over a shared async engine; implemented install planning, rollback-aware state recording and SHA-256 trust checks.

RECOGNITION

- VisagioX Hackathon - 3rd place, 2026, for a team-built child-safety prototype.
- LaunchLAB AI, AITAI / Bloom - selected for Semester 1, 2026 (Mar - May).
- Technical Resources Scholarship - Curtin University, 2025.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Go, Rust, Python, C/C++, C#, SQL, Bash

Frameworks & APIs: React, Next.js, Angular, SvelteKit, NativeScript, .NET, REST/OpenAPI, protobuf

Data & Infrastructure: PostgreSQL, SQL Server, EF Core, Docker, Kubernetes/AKS, Azure DevOps, Linux
